WORK EXPERIENCE

NQLB Remote
Software Engineer *January 2024 - Present*

- Engineered a microservice with Node.js to extract and process transactional data from bank statements in PDF, CSV, and Excel formats, handling approximately 500 statements per day.
- Architected RESTful APIs using PHP (Lumen Framework) for seamless integration with the frontend, enhancing user experience and ensuring scalability.
- Created and implemented SQL queries for use in the analytics endpoints, delivering valuable insights into users' transaction data resulting in a 25% increase in user engagement.
- Automated local deployments with Apache configurations and bash scripts, optimizing the microservice environment.
- Utilized Bitbucket for version control, managing branch workflows, pull requests, and code reviews to facilitate collaboration and streamline the development process.

Lexlance Remote
Tech Lead (Freelance) *October 2023 - Present*

- Led a 6 member team through the end-to-end product development process, from ideation to deployment, demonstrating a holistic understanding of the software development lifecycle.
- Developed responsive user interfaces using React, SCSS, and CSS Modules, integrating RESTful APIs built with Node.js to enhance functionality and user experience.
- Integrated the Paystack payment gateway to facilitate secure and efficient payment processing on the platform, enhancing user transaction experiences.

Brooi Remote
Frontend Developer *August 2023- December 2023*

- Developed and maintained the user interface of a prop-tech platform using Vue.js and CSS, improving usability and overall user experience.
- Innovated an image editing tool using HTML Canvas for pixel manipulation, enabling users to perform 5+ modifications on uploaded images.
- Optimized application state management with Vuex, centralizing state logic and facilitating efficient updates across components.

Gamepride Remote
Frontend Developer *January 2023- August 2023*

- Engineered the UI for a gaming platform using React, Tailwind, and TypeScript, attracting 1000+ new users within three months of launch.
- Implemented a support feature that reduced issue resolution time by 30%, allowing users to track and manage their support requests.
- Built a lounge feature that enables users to join chat rooms and communicate with other players in real-time using Socket.

PROJECTS

- [Cover Bank](#) - Website displaying album covers by Nigerian artists (React, Airtable, and SCSS)
- [Foodpulse](#) - A food-tech app (Next.js, Three.js, and Tailwind)
- [Linavel](#) - A custom PHP framework (PHP)
- [The Folk](#) - Website for a music and talent management company (React and Tailwind)

SKILLS

JavaScript | Typescript | React | Vue | Node | PHP | Laravel | Apache | Bash | MySQL | HTML | CSS | SCSS | Tailwind | Firebase | Airtable | GSAP | Three.JS
